

Medical Billing & Payment Policy

Medical visits (including testing, procedures, or diagnosis) are billed to medical insurance. Vision plans cover routine exams only. You are responsible for any copays, coinsurance, and deductibles determined by your insurance company.

A credit card on file is required for medical visits. Your information is securely encrypted and your card number is not stored. After insurance processes your claim, we will notify you of any balance. Your card will be charged 48 hours later unless you make other arrangements.

If you prefer not to keep a card on file, full payment is due at time of service. Any insurance reimbursement will be refunded.

I authorize Woodbine Eye Care to charge my card for any balance assigned by my insurance. I understand I will be notified prior to any charge and may choose an alternative payment method. This authorization remains in effect until canceled in writing.
